

# *Experiences With a FHIR Ecosystem Platform's Queryable APIs*

Session #78, August 10, 2021, 4:00pm, Room Summit 211, Caesars

**Helen L. Hill, FHIMSS**

Board Director of Public Policy, Michigan HIMSS Chapter and Board Director at Large, MIHIN

**Allen Flynn, PharmD, PhD**

Assistant Professor of Health Informatics, University of Michigan

DISCLAIMER: The views and opinions expressed in this presentation are solely those of the author/presenter and do not necessarily represent any policy or position of HIMSS.

# Today's Speakers

Helen Hill

Michigan HIMSS Chapter and MIHIN

Allen Flynn

University of Michigan

## Team Members

**Rutendo Goto**, Intern, Interoperability Institute

**Mary Kratz**, Executive Vice President, Interoperability Institute

**Morgan Schrauben**, Human Resources Program Manager, MIHIN

**Oliver Strong**, Product Engineer, Interoperability Institute

**Stephanie Arntson**, Strategic Partnerships Manager, Interoperability Institute

## *Conflicts of Interest*

**Helen L. Hill, FHIMSS, is Board Director at Large for Michigan Health Information Network Shared Services (MIHIN).**

*The Interoperability Institute, a subsidiary of MIHIN, offers its own FHIR ecosystem sandbox (Interoperability Land™) and collaborates with the Interop.Community to offer a public, open source FHIR sandbox.*

The speakers have no other real or apparent conflicts of interest to report.

# *Agenda for Today*

- **Introduction to our Project and Partnership Program**
  - Collaborative Partnership
  - Main Purpose of the Partnership
  - Things That Motivate Us
- **Technical Work on Complex, Multi-target FHIR queries (Query Kits for FHIR)**
  - Platforms Used
  - Examples of Query Kits for FHIR
  - Educational Programming
- **Summary and Next Steps**

## *Specific Learning Objectives*

- Explain what complex, multi-target FHIR® queries (**Query Kits**) are and do.
- Critique the potential for **Query Kits** to fill information gaps pertaining to telehealth, medication reconciliation, and social determinants of health
- Identify whether using **Query Kits** might provide a suitable solution for one or more health information needs of interest to YOU!

## *We Have Formed a Unique Partnership*

**HIMSS  
Michigan Chapter**  **Interoperability  
Institute**  **University of  
Michigan**

# *HIMSS Michigan Chapter*

- **Breadth and Diversity**
  - 1,700 members
  - Extraordinary member talent and diversity
- **Collaboration, Education and Leadership**
  - Health IT & Health Info Exchange innovation, policy, workforce development
  - HIMSS Changemaker Chapter for advocacy
  - Partner on interoperability, care coordination, use of standards
  - Work on Michigan HIT Commission' s Statewide 5-Year HIT Roadmap
  - Sponsor interns
  - Conduct career fairs

# *Interoperability Institute*

IOI offers a neutral HIT space where ...

- **Organizations can collectively demonstrate interoperable HIT solutions**
  - IOI Provides the Interoperability Land™ sandbox with synthetic FHIR data
- **People can learn to innovate with modern technologies & standards**
  - IOI Organizes Connectathons and Interoperathons
- **HIT workforce development can take place**
  - IOI Runs an Internship Program for 100+ student interns
  - Recognized by HIMSS Technology Informatics Guiding Education Reform (TIGER)

# *University of Michigan's Health IT Programs*

- **Masters in Health Informatics**
  - @ School of Information
  - Residential
  - $\approx$  40 students per year, some of whom are IOI Interns too!
- **Masters in Health Infrastructures and Learning Systems**
  - @ Medical School
  - Online and Residential
  - $\approx$  20 students per year
- **PhD in Health Infrastructures and Learning Systems**
  - @ Medical School
  - Residential

# *We Value Tech “Sandboxes” for...*

## ***Collaboration***

Team up to solve complex problems.

## ***Learning***

Fail and learn quickly without dire consequences.

## ***Innovation***

Gain new skills, methods & solutions.

## ***Validation***

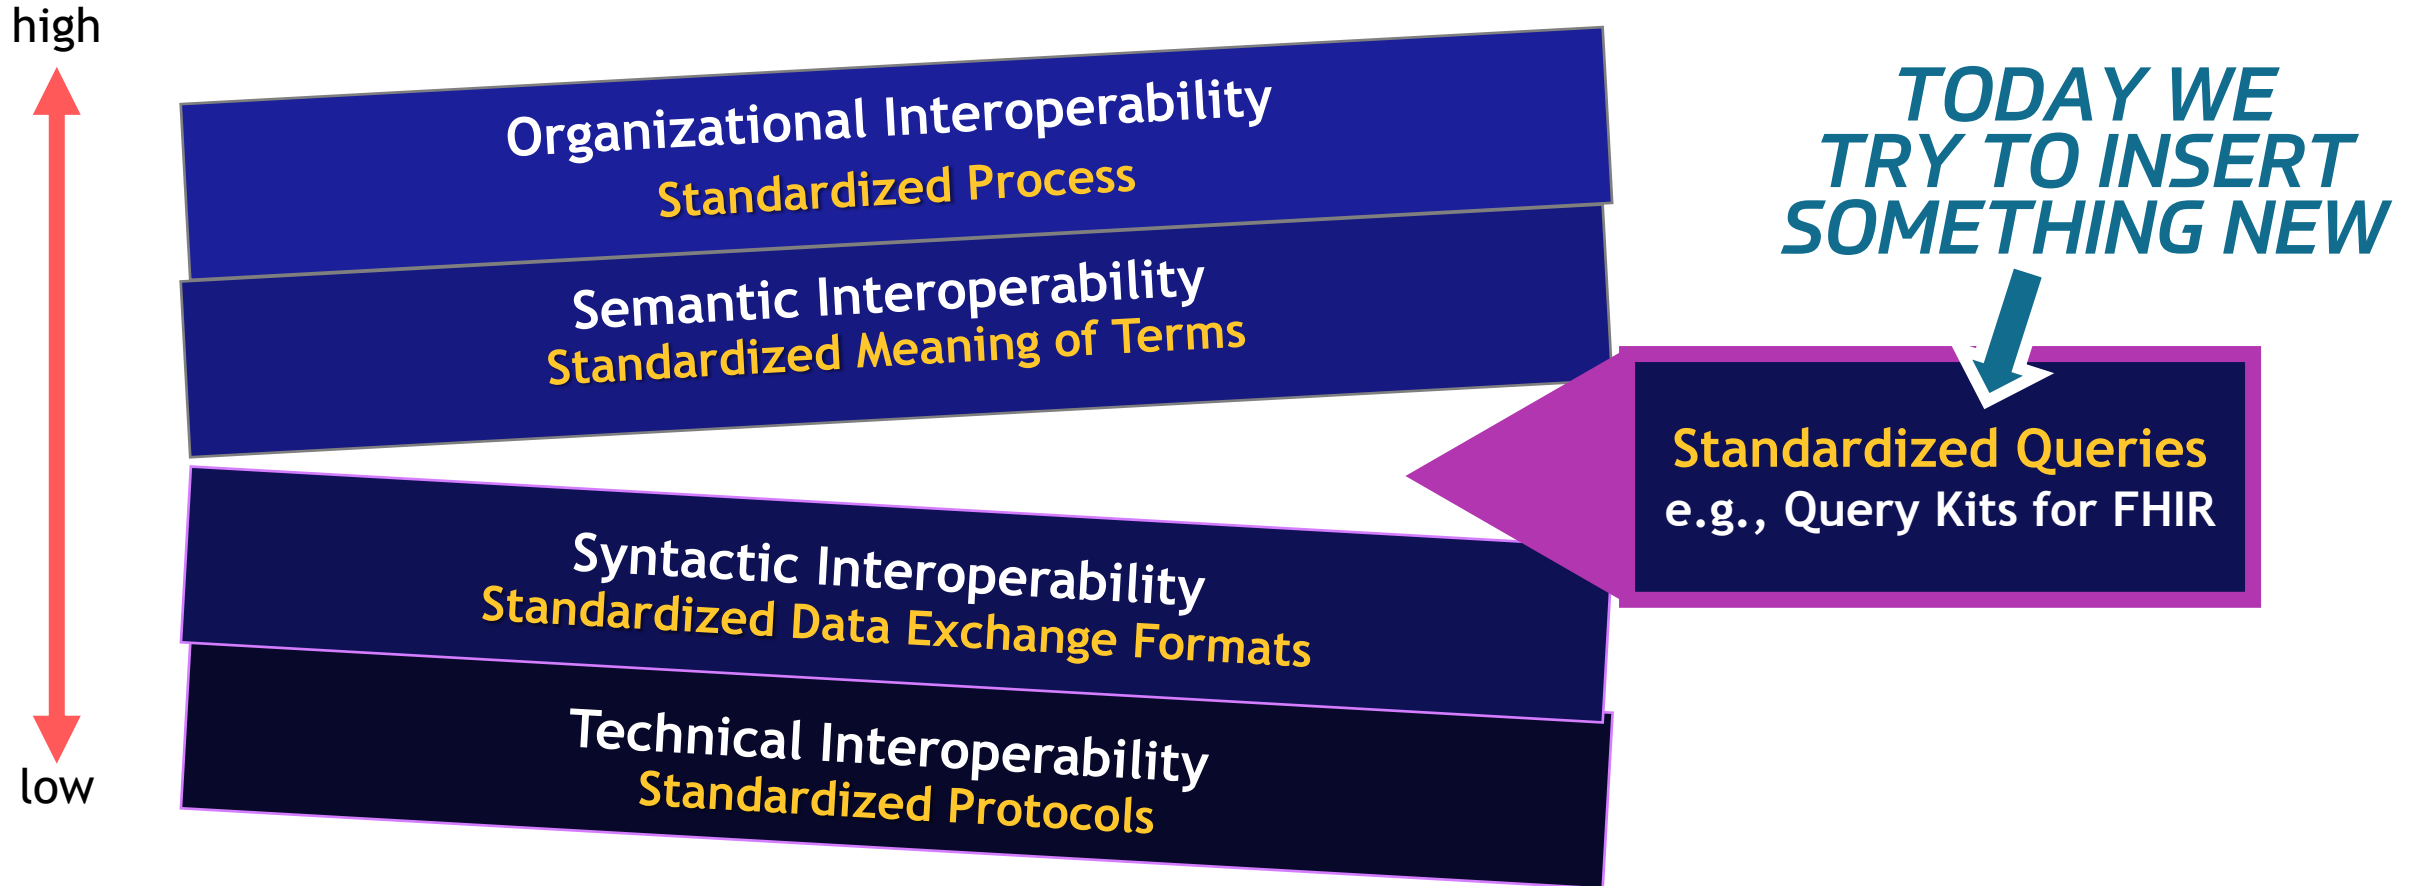

Test rigorously with shared tools, data & personas.

# Our Goal is Holistic Interoperability

## ***Some of the Things That Motivate Us***

- Advancing standards and standards harmonization in specific areas

**Social Determinants of Health (Gravity, Siren, etc.)**

**Reconciling Syntax/Semantic Variation in FHIR Resources for EHRs & Other Health IT**

- Making improvements in

**Patient identification**

**Industry-wide app testing platforms**

**Uptake of patient reported outcomes data**

**... and Shareable Queries**

## *Audience Question #1*

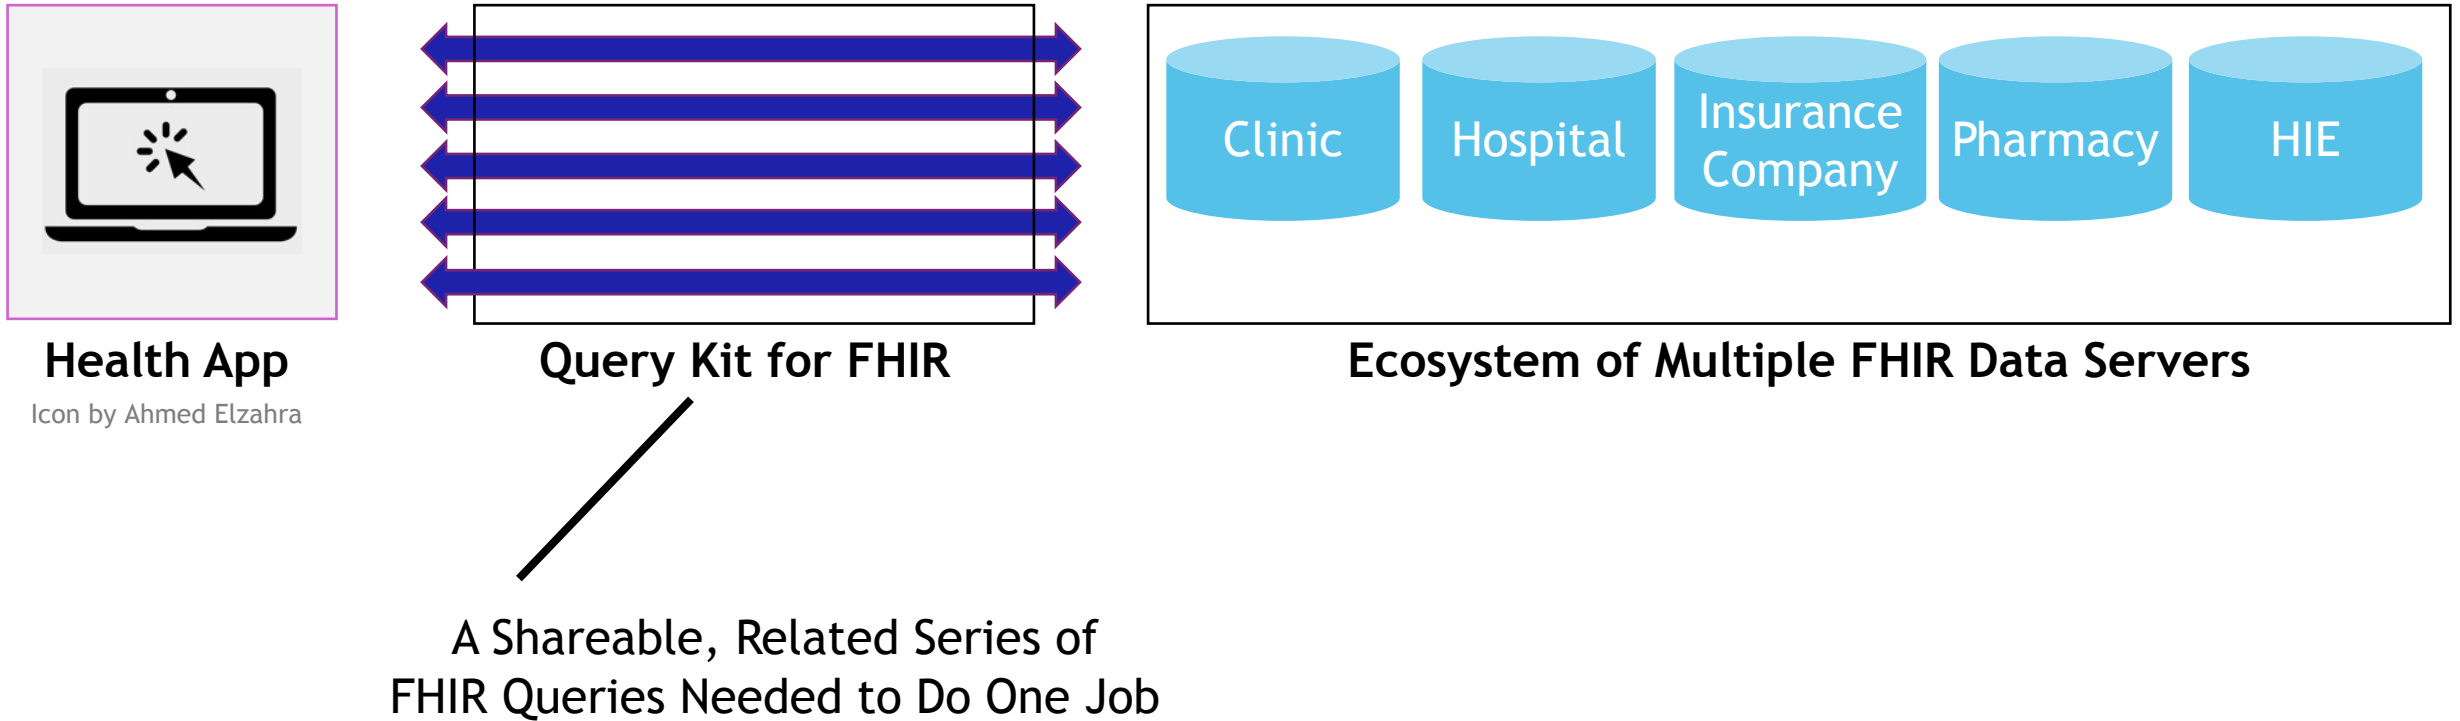

What interests you **MOST** about advancing Healthcare Interoperability?

- Empowering people with better data sharing?
- Providing AI-driven apps?
- Accelerating a move to the cloud?
- Improving clinical care and research across the continuum?

# *What are Query Kits?*

*(aka Complex Multi-target FHIR Queries)*

# *The General Idea of a Query Kit*

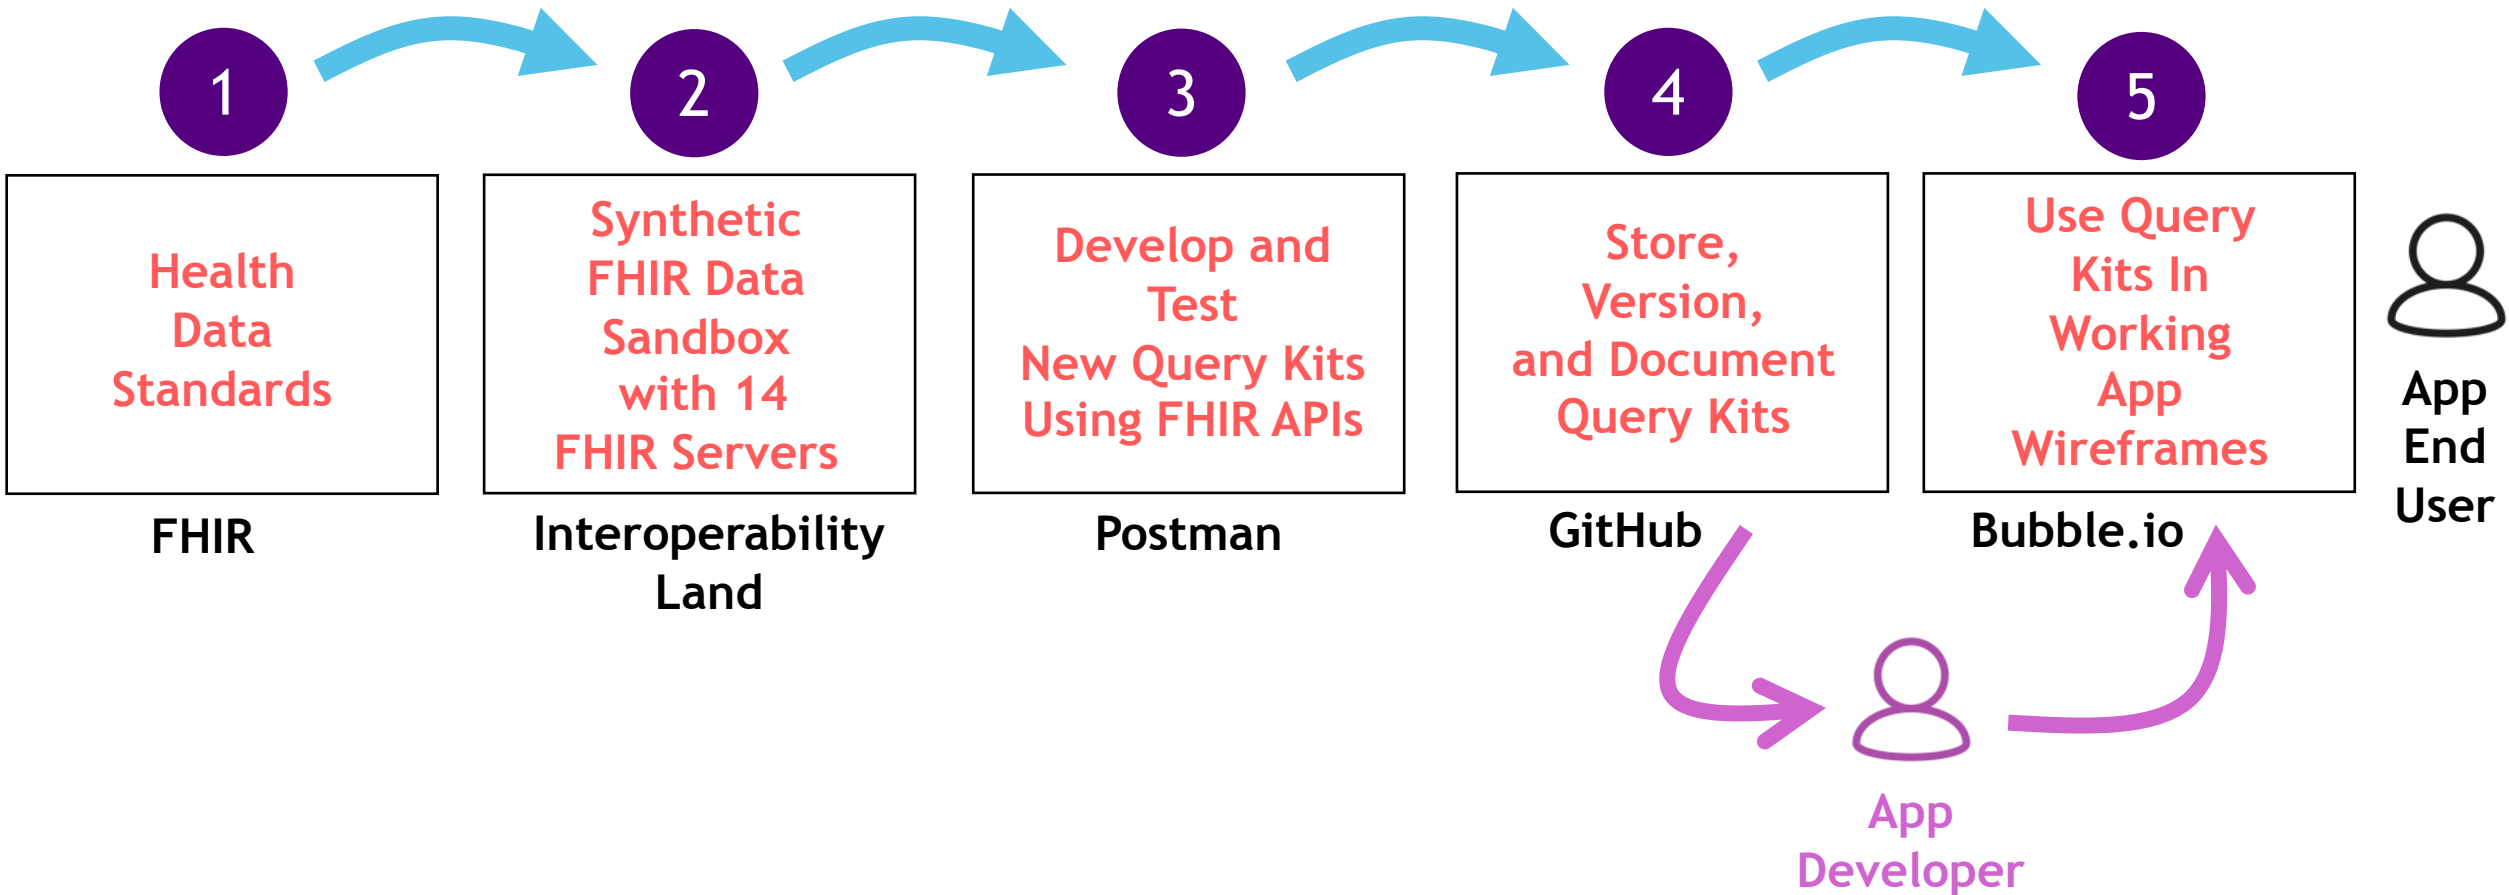

## *Job of a Query Kit for Medication Reconciliation*

- Identify one or more FHIR server locations with a patient's medication resources
- GET multiple types of medication-related FHIR resources from those locations
  - **MedicationStatement**
  - **MedicationRequest**
- OPTIONAL: Limit the “lookback” time period to minimize information overload
- OPTIONAL: Have the FHIR servers order the information retrieved

# Overview of Our Setup to Create Query Kits

# About our Data

1

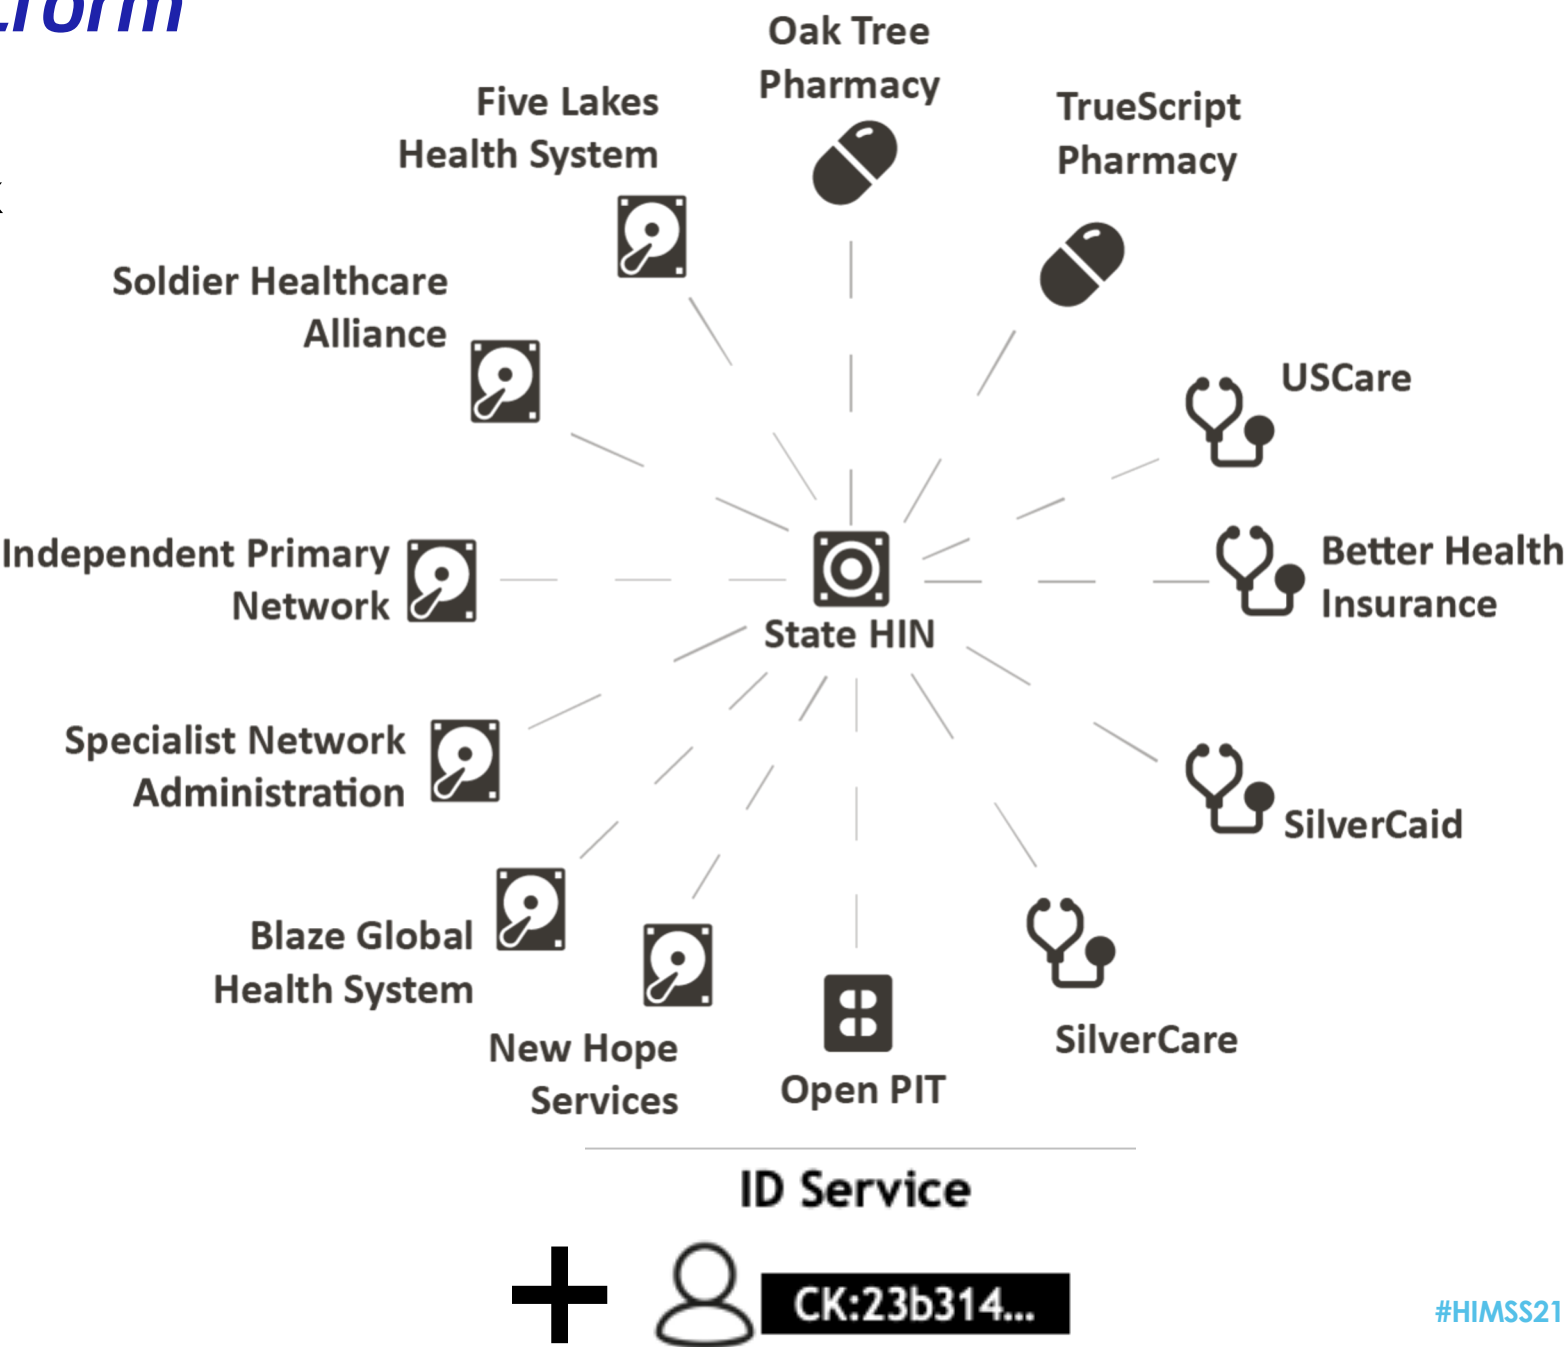

HL7 FHIR  
resources

# About our Data Platform

## Working App Wireframes

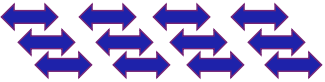

**APP Wireframe**

## Generalizing Our Setup

# Query Kit for Medication Reconciliation

- 1  Patient Last Name Query *returns* List of Patients With Same Last Name
-   
End User *Selects One Patient*
- 2  Patient Common Key Query *returns* Selected Patient's Common Key
- 3  Patient Data Inquiry Queries *return* Local Patient ID, when found
- 4  Medication Data Queries *return* Medication Request OR Medication Statement

Icon by Ahmed Elzahra

Patient Application Gains All Available Medication Information for One Patient

# App Using Query Kit for Medication Reconciliation

Not a Real Person!

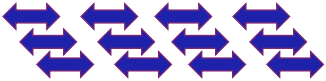

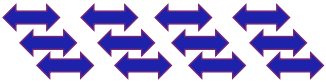

The screenshot displays a patient record for Stephanie Mitchell, born 1959-08-17. The interface shows a list of medications and their sources. The sources are categorized into two main groups: 'Independent Primary Care Network' and 'Five Lakes Health System'. The medications listed are Aspirin, Levothyroxine, Nabumetone, and Lisinopril. The sources are further categorized into 'Blaze Global Health', 'True Script Pharmacy', 'Silvercaid', 'Silvercare', 'Better Health Insurance', and 'MIHIN'. The medications are listed in purple text, and the sources are listed in black text. The interface also shows a search bar and a list of other patients.

Source	Medications
Independent Primary Care Network	Aspirin, Levothyroxine, Nabumetone
Five Lakes Health System	Levothyroxine, Lisinopril, Nabumetone
Blaze Global Health	Aspirin
True Script Pharmacy	Albuterol, Levothyroxine, Lisinopril, Nabumetone
Silvercaid	Levothyroxine
Silvercare	Albuterol
Better Health Insurance	Levothyroxine, Lisinopril, Nabumetone
MIHIN	Aspirin, Levothyroxine, Lisinopril, Nabumetone

View of Where One Patient's Data Was Found

# Query Kit for Social Determinants of Health

- 1  Patient Last Name Query *returns* List of Patients With Same Last Name
-   
End User *Selects One Patient*
- 2  Patient Common Key Query *returns* Selected Patient's Common Key
- 3  Questionnaire Queries *returns* Available Questionnaires at Organizations of Interest
- 4  Patient Questionnaire Response Queries *returns* Patient Responses to SDOH Questionnaire Items

Icon by Ahmed Elzahra

Patient Application Gains All Available  
Questionnaire Responses for One Patient

## Query Kit for Social Determinants of Health

### Living Situation

Worried about a place to stay

Never true

Do you worry about pests, molds or lead paint or pipes

Sometimes true

### Transportation

Worried about transportation

Sometimes true

Unable to get stuff for daily living

Often true

### Food Security & Access

Worried food would run out

Often true

Food did not last

Sometimes true

### Employment

Worried about employment

Often true

Found employment

Often true

App View of Most Recent Patient Answers to SDOH Questionnaires

## *Available GitHub Repository with Query Kits*

- Go to <https://github.com/cmtfqqs/queries>
- Sharing Query Kits as POSTMAN collections for these use cases
  - **Telemedicine**
  - **Medication reconciliation**
  - **Social determinants of health**
- Documentation in a README
- Easily convert queries to code in many programming languages, e.g. JavaScript

## ***Audience Question #2***

Which **data resources** and **queries** most interest you and your teams?

- SDOH data?
- Patient reported outcomes?
- Continuity of care data?
- Treatment outcomes data?

## *About our ongoing educational program*

## *Education on FHIR & Interoperability – Initial Results*

From:  
FALL 2020  
INTRODUCTION  
TO  
HEALTH  
INFORMATICS,  
University of  
Michigan

# *We Have a Growing Educational Program*

## *How to join in*

- Contact today's speakers or the Interoperability Institute for more information

[interoperabilityinstitute.org/contact/](https://interoperabilityinstitute.org/contact/)

## *Benefits*

- Instructional Materials
  - **Interoperability**
  - **FHIR Standards**
  - **Querying HAPI FHIR servers**
- FHIR App Ecosystem Sandboxes
  - **Public domain, open source**  
<https://interop.community/>
  - **Private, members only**  
<https://interoperabilityinstitute.org/interoperabilityland/>

## *Summary Points*

- Power of partnership
- Our work anticipates coordinated FHIR Data Ecosystems with common patient IDs
- Shareable standardized queries
- Providing opportunities for the next-generation health IT workforce

## *Next Steps*

- Further curriculum development
- Build and demo SMART-on-FHIR apps that use standardized Query Kits for FHIR
- Provide feedback to improve app testing platforms

## *Any Questions About All This Stuff?*

- **Query Kits** (Shareable Complex Multi-target FHIR Queries)
- **Platforms & Tools** (Interoperability Land, Postman, Github, Bubble.io)
- Goal of Accelerating Health App Development
- How Are Organizations Going to Expose Their Data APIs?
- Goal of Educating the HIT Workforce of the Future
- Expanding Partnerships to achieve Holistic Interoperability
